**Course Overview**

Experts from around the country will lead a dynamic, multi-faceted educational experience, including "TED" talks, small group discussions, panel discussions, breakout sessions, and extended learning opportunities. Participants will learn how to approach the treatment of chronic non-cancer pain from a collaborative, multidisciplinary, non-opioid perspective, based upon current research and best practices.

**Learning Objectives**

- Understand the principles and best practices of chronic pain management.
- Learn how to better screen individuals who present with chronic pain and to create appropriate management regimens.
- Learn effective communication strategies for dealing with chronic pain patients helping them become engaged and motivated to make long-term changes to their health.

**Intended Audience**

Physicians, DOs, NPs, PAs, NPs, RNs, psychiatrists, psychologists, pharmacists, social workers, counselors, substance abuse treatment professionals, P&O’s, administrators, and other health care professionals who treat patients with chronic pain.

---
